Executive Summary

CoStar Analytics 2Q2020		Total Square Feet	Physical Occupancy	Asking Rent
Office Market	Collier	9,717,492	90.8%	$25.24
	Lee	20,624,344	93.8%	$18.07
	Charlotte	4,017,686	94.6%	$17.71
Retail Market	Collier	23,627,489	95.2%	$22.77
	Lee	47,721,452	94.4%	$16.95
	Charlotte	10,824,013	96.5%	$14.48
Industrial Market	Collier	13,187,100	95.1%	$11.41
	Lee	33,404,167	95.8%	$8.36
	Charlotte	4,746,658	98.7%	$8.54

2020 has been a whirlwind of conflicting data shedding light on the fallout of COVID-19 along with little guidance of what lies ahead. National indicators are fluctuating weekly as sentiment about an improving economy is in flux. Volatility is the best word to describe the current atmosphere as treasury yields continue to signal deep concerns about the economy. The 10-year yield tends to rise when people expect economic growth and inflation and falls when the outlook darkens. The yield climbed on positive job recovery numbers nationally in May but has since fallen as the anxiety increases on a second COVID-19 outbreak. The government has been on a spending spree to flood the market with liquidity in hope to stifle a recession with second quarter GDP expected to contract by 16.5% annualized. Going forward the recovery will be predicated on a positive outlook on Covid-19 as it relates to the economy regaining strength.

Locally, the unemployment rate for all three counties is above 13% as the shutdown of the economy greatly affected the peak activity months for tourism in the area. Airport traffic for April were at all-time lows with May showing a slight recovery but still well off the highs experienced in 2019. Air travel around the country continues to increase daily and we expect a late blooming tourist season this summer. The summer months experiencing an above average season should bode well for a local economic recovery as well as increase the local employment levels.

Notable development around Southwest Florida to watch for:

- Physicians Regional Medical Office in Collier County
- RSW Traffic Control Tower & Neogenomics / Scottlyn Headquarters in Lee County
- Sunseeker Resort Progress in Charlotte County

Macro-Economic Outlook

Gross Domestic Product

Gross Domestic Product (GDP) is a measure of total economic output. Total GDP is comprised of consumption, business investment, government spending and net exports, with consumption accounting for approximately 70%. As a result of the pandemic, GDP in the first quarter of 2020 nationally shrank by an annualized 4.8%. Expectations for the second quarter forecast a decline of 16% annualized. Florida comprises approximately 5.0% of the overall U.S. GDP, the fourth largest state economy in the country.

The Bureau of Economic Analysis estimates quarterly GDP by industry, which measures an industry's contribution to the gross domestic product of the United States. It's also known as "value added by industry." An industry's value added is the market value it adds in production, or the difference between the price at which it sells its products and the cost of the inputs it purchases from other industries. Value added for all U.S. industries combined is equal to the nation's GDP. GDP by industry data also include compensation of employees, gross operating surplus, and taxes. The following is the measure of contribution from private industries to 2019Q4 GDP. Industries are classified by the North American Industry Classification System.

Real GDP Contribution in 2019Q4 by Industry	U.S.	Florida
Private industries	100.0%	100.0%
Agriculture, forestry, fishing and hunting	1.4%	0.9%
Mining, quarrying, and oil and gas extraction	3.2%	0.3%
Utilities	1.8%	1.8%
Construction	3.9%	5.0%
Manufacturing	12.9%	6.3%
Wholesale trade	6.7%	7.9%
Retail trade	6.9%	8.7%
Transportation and warehousing	3.3%	3.6%
Information	7.3%	5.8%
Finance and insurance	7.2%	6.3%
Real estate and rental and leasing	14.3%	17.9%
Professional, scientific, and technical services	9.1%	8.7%
Management of companies and enterprises	2.6%	2.3%
Administrative and support and waste management and remediation services	3.5%	4.5%
Educational services	1.3%	1.1%
Health care and social assistance	8.7%	10.0%
Arts, entertainment, and recreation	1.2%	1.8%
Accommodation and food services	3.1%	4.5%
Other services (except government and government enterprises)	2.2%	2.7%

Real Gross Domestic Product, Billions of Chained 2012 Dollars, Quarterly, Seasonally Adjusted Annual Rate

Southwest Florida Taxable Sales Data

Taxable sales data for various Metropolitan Statistical Areas (MSA's) are popularly used as one indicator of regional economic activity. These data come to the state on sales tax returns filed monthly by retail establishments with the Florida Department of Revenue. The following categories comprise taxable sales.

Tourism & Recreation- hotels and motels, bar and restaurant sales, liquor stores, photo and art stores, gift shops, admissions, sporting goods, rentals, and jewelry stores.

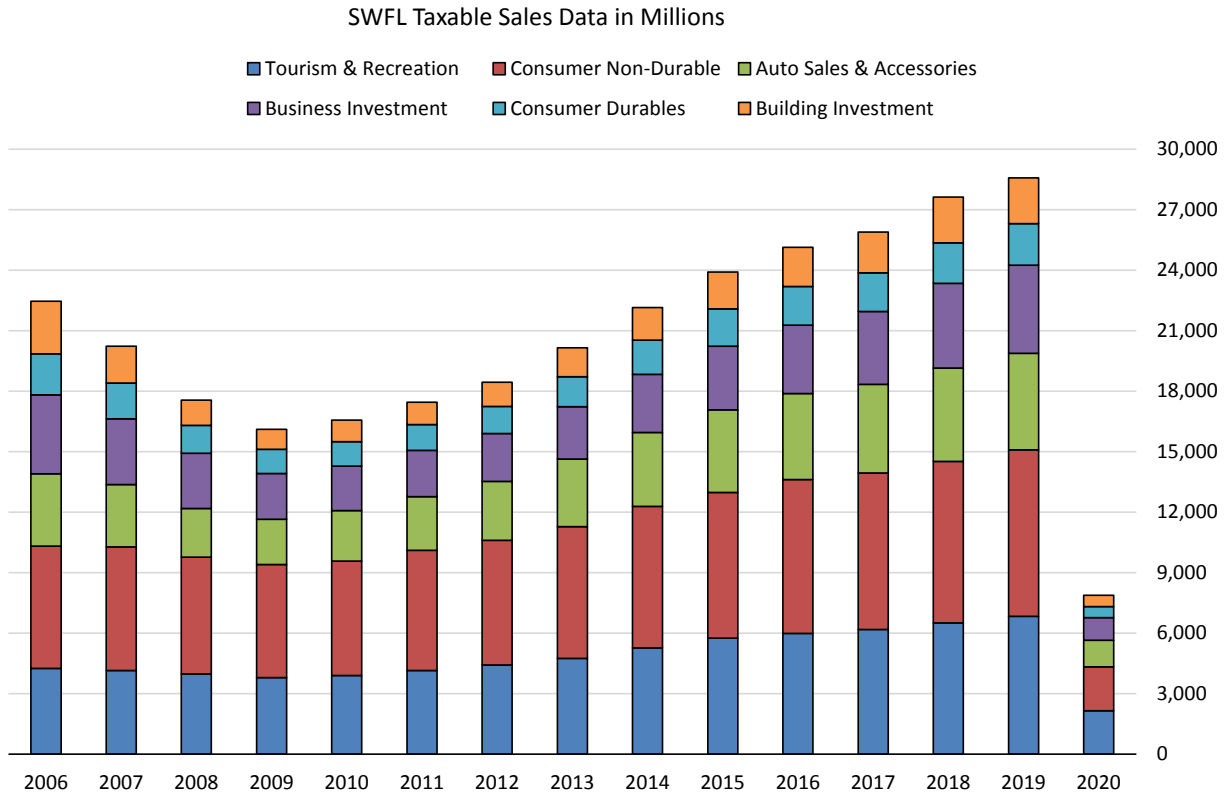
Consumer Nondurables- food & convenience stores, department & clothing stores, drug stores etc.

Autos & Accessories- the sale of new and used cars, repair shops, auto supply stores, and taxable sales at gasoline stations.

Business Investment- farm equipment, feed and seed suppliers, store and office equipment, computer shops, machine shops, industrial machinery, hotel and restaurant suppliers, transportation equipment etc.

Consumer Durables- the sale of appliances, furniture, home electronics, aircraft, boat dealers, hardware and decorating stores.

Building Investment- includes sales by building contractors, heating and air conditioning contractors etc.



Between 2018 and 2019, Lee County experienced a 3% increase in taxable sales while Collier County experienced 5.2% and Charlotte County remained even. Through the first three months of 2020 taxable sales were on a similar pace with the first three months of 2019.

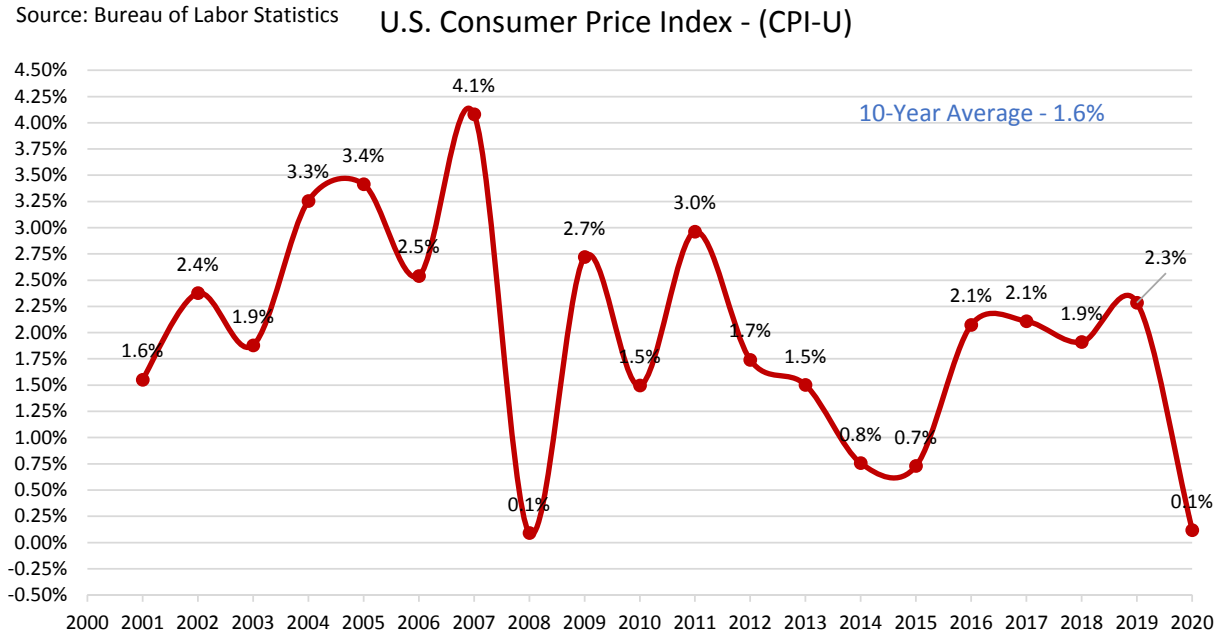
Consumer Price Index

The consumer price index (CPI) is a measure of the average change over time in the prices paid by consumers for a market basket of consumer goods and services. An increase in the CPI indicates that the cost of goods is increasing and thereby the purchasing power of the dollar is weakened.

Source: Bureau of Labor Statistics



Between May 2019 and May 2020, the consumer price index increased by 0.1%. Ideal target inflation for a growing economy is 2.0%. Categories with the largest year over year drop included energy and transportation services.

London Interbank Offer Rate / 10-year Treasury

The London Interbank Offered Rate (LIBOR) 3-month interest rate is what is often charged for short term loans between banks and is used as the benchmark for construction loans. It has dropped from a high of over 5.0% in 2007 to a low of under 0.5% in 2014 with a ten-year average of 0.88%. Forecasts going forward expect the rate to maintain between 2.0 and 2.5%. LIBOR moving forward will no longer be the benchmark for construction loans as the Secured Overnight Financing Rate is being chosen as the preferred rate.

The 10-year treasury yield rate has correlated similarly to the LIBOR rate with highs in 2006/2007 and a low in 2012 with a 10-year average 2.44%. The ten-year treasury is often the benchmark for long term debt instruments and directly affects yields on leveraged projects. Cap rates tend to rise and fall with the change in the 10-year treasury. With the uncertainty in the marketplace the 10-year treasury yield has fallen to below 0.75%. The 10-year treasury tends to rise when economic growth is expected and falls when the outlook darkens.

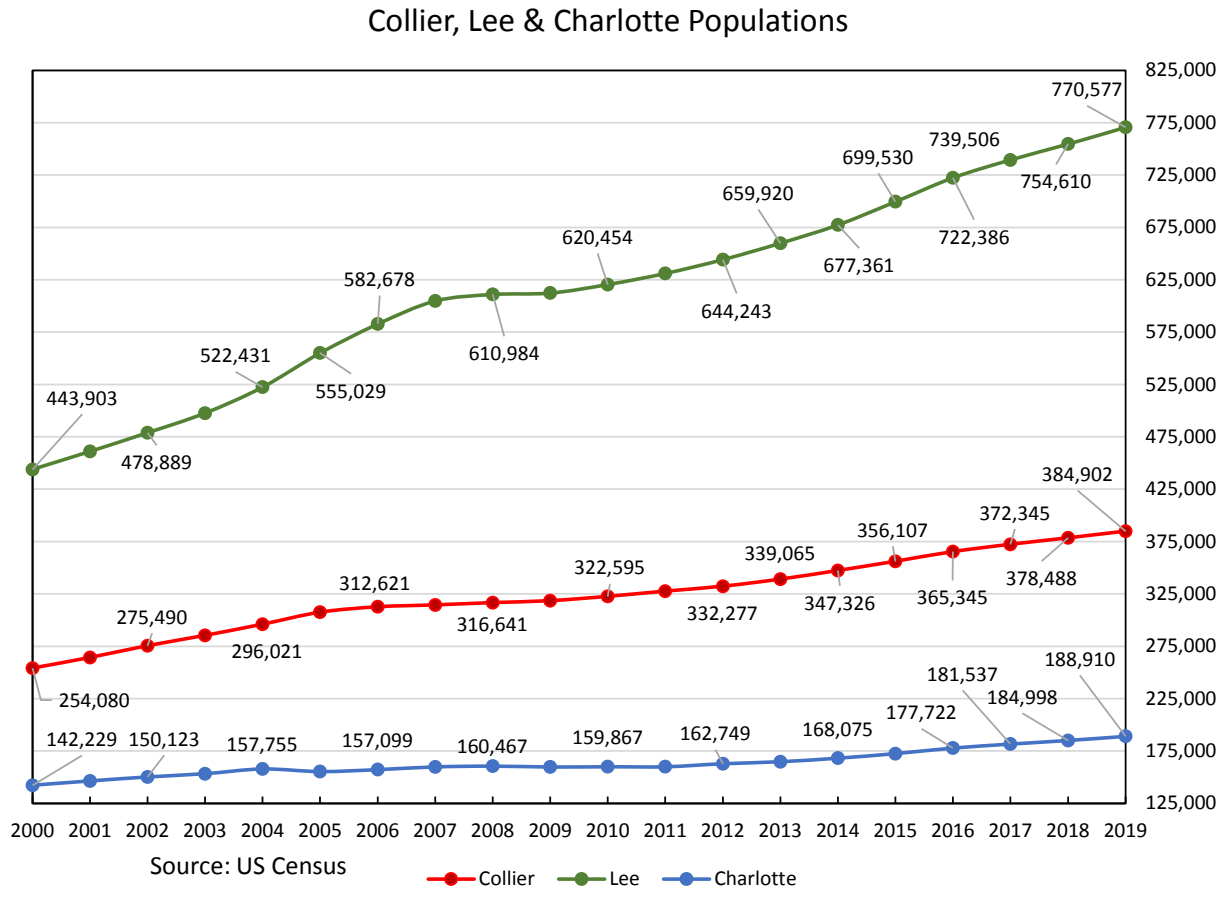
Southwest Florida Population

Southwest Florida continues to be one of the fastest growing areas in the nation. Growth is attributed to in-migration mostly from Northeastern and Midwestern states. However, foreign migration and intrastate migration are also significant factors for growth. U.S. Census Population Estimates, released in April 2020, showing the recent growth can be seen in the graph below. The data highlights population estimates as of July 1st each year through 2019. It shows Southwest Florida continuing to experience significant gains in population with a 2.0% gain (or 26,203 people) in 2019 over 2018 for Collier, Lee, and Charlotte Counties combined. This is four times the national population growth rate (0.48%) and almost double Florida's population growth rate (1.1%) over the same period. The population trends for all three counties can be seen below.



2020 U.S. Census Population Estimates at the county level are scheduled to be released in mid-2021.

Southwest Florida Housing Formation

There were a total of 17,915 permits issued for new residential housing units in Collier, Lee, and Charlotte Counties combined over the past 12 months, ending on May 31, 2020. This was a 6.7% increase from the previous 12-month period, which saw 16,785 new residential housing units permitted. When we look at only permits issued for new single-family detached homes (9,964), our market saw a 0.7% decrease. Looking forward, we project to see between 9,000 – 12,000 new residential units permitted over the next 12 months. The combined monthly trend can be seen in the following chart.

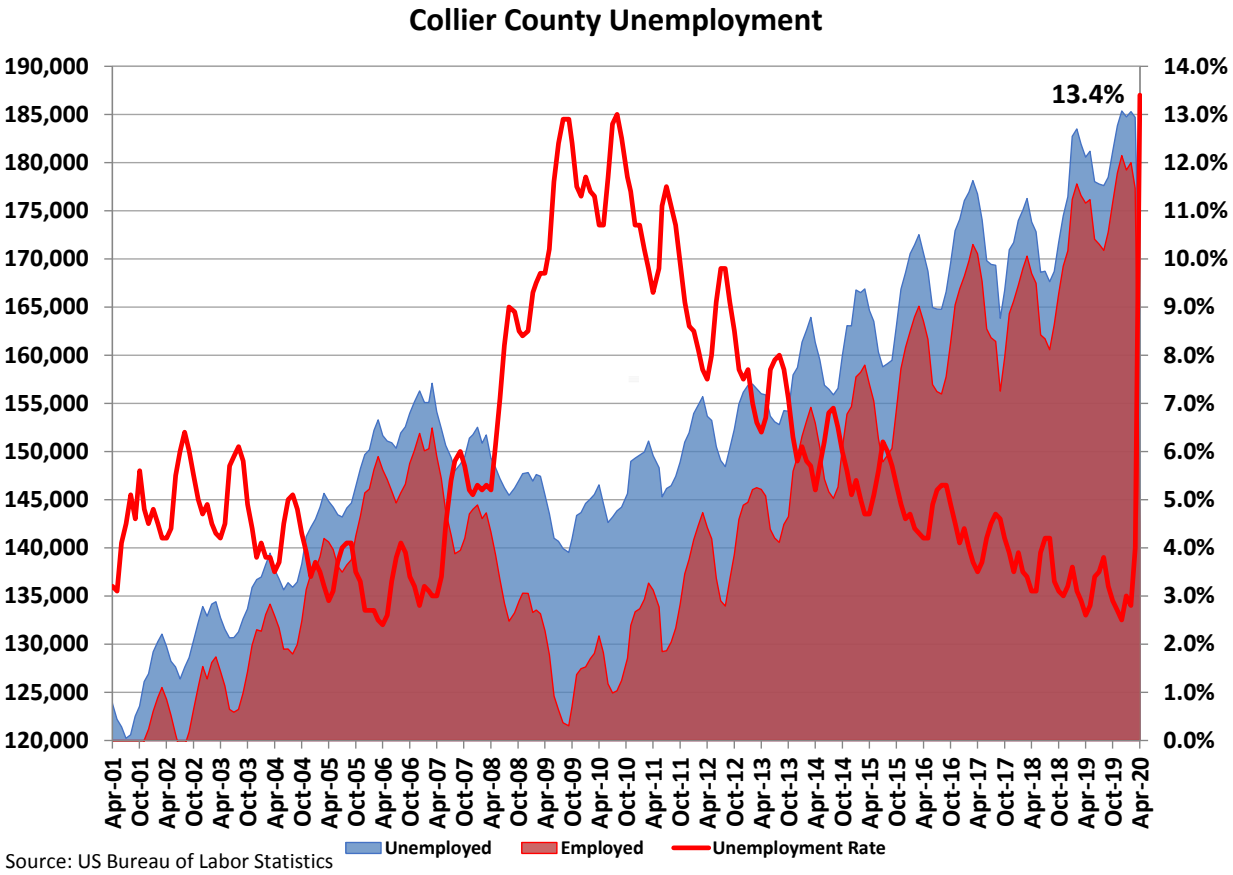
Employment

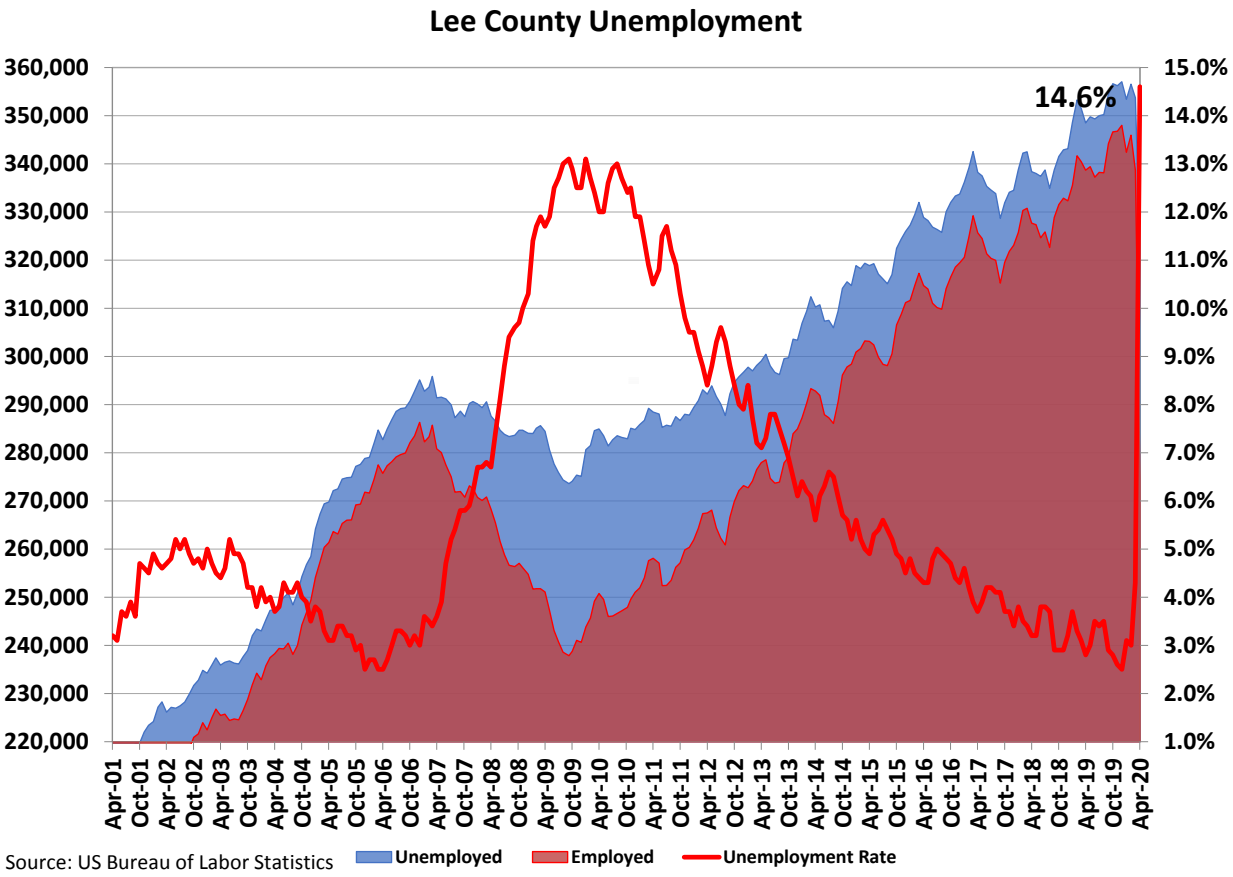
The graphs in this following section depict historical and current employment conditions at the county, state, and national levels. Note the strong seasonality in Collier County's unemployment rate. As of April 2020, Collier's unemployment rate fell jumped to 13.4% from the fallout of the pandemic. Employment should slowly regain in the coming months as more employees are brought back with the economy reopening.



Source: US Bureau of Labor Statistics

© 2020 LSI Companies, Inc. All Rights Reserved. Duplication of this report is prohibited.

Lee County has less seasonal irregularity than Collier County and may be more relevant to the overall job market in Southwest Florida, which also affects the primary housing demand in the area. It is important to note that recent employment figures for Lee County prior to the pandemic show more people employed in the county than any time in its history. As of April 2020, the unemployment rate was 14.6%.



Source: US Bureau of Labor Statistics

© 2020 LSI Companies, Inc. All Rights Reserved. Duplication of this report is prohibited.

Charlotte County in April 2020 had an unemployment rate of 15.6%.

Data compiled and edited by the Regional Economic Research Institute. All data is current as of 2019, unless noted otherwise.

* Data as recent as 2018 Q3.

** Data as recent as of 2017.

The Southwest Florida economy is heavily tied to the residential construction and service industries. There have been noticeable improvements in those industries over the past few years that have done a great deal to increase job growth in Southwest Florida.

Location Quotient

Location quotient (LQ) is essentially a way of quantifying how concentrated a particular industry, cluster, occupation, or demographic group is in a region as compared to the nation. It can reveal what makes a particular region "unique" in comparison to the national average. The following graphs depict how concentrated occupations are based on the North American Industry Classification System (NAICS) on the local county level vs that of the overall State of Florida.

LQ for occupations are calculated by dividing the regional concentration of an occupation by the state or national concentration of that same occupation. So, suppose that Registered Nurses in a region account for 0.10% of all jobs, while in the nation they account for 0.09% of all jobs. The LQ of nurses in the region is thus (.1 / .09 = 1.11). This means that the region has a higher than average concentration of nurses. Anything higher than 1.2 is determined to be an economic base industry. The larger circle indicates the relative size of the industry in comparison to other sectors.

High-LQ occupations are important because they are generally employed by high-LQ industries, which tend to be export-oriented and form the majority of the region's economic base. High-LQ occupations thus provide a workforce-oriented perspective of the region's economic base. Such occupations are vital for the continued prosperity of the region.

MARKET RESEARCH & REPORTING

by Nelson Taylor, MRICS, MSRE, Market Research Director

As the Director of Market Research for LSI Companies, it is my goal to provide the most accurate and up-to-date information about commercial land and improved properties throughout Southwest Florida. I have been active in real estate statistics and valuation for several years. Unlike other research organizations that rely on national data to formulate market predictions, we track transactional data including permitting and demographics to paint an accurate picture of the market in real time. We research every aspect of statistical and transactional data in Lee, Collier and Charlotte counties to keep the finger on the pulse in Southwest Florida.

Nelson Taylor, MRICS, MSRE serves as the Market Research Director for LSI Companies. He focuses on the market analytics of residential and commercial properties throughout Southwest Florida, in order to provide clients with clear market analysis. Nelson has 11 years of real estate experience where he supplied services for a broad range of commercial real estate product types throughout Florida. Nelson has worked directly with clients to develop market-based solutions in response to complex real estate issues for use in strategic asset management, investment analysis, portfolio valuation and litigation.

Should you need assistance with real estate market research or reporting, please consider LSI Companies as your brokerage firm that can provide your organization with any of the following:

- Market Studies
- Valuation Services
- Litigation Support
- Target Market Analysis
- Highest and Best Use Analysis
- Feasibility Analysis
- Site Selection
- Data Gathering
- Appraisal Reviews
- Pricing Strategy
- Absorption Forecasts
- Demographic Analysis
- Acquisition, Reposition, & Disposition Strategies
- Broker Opinion of Value
- Custom Reports
- Product Recommendations
